Welcome to Chain Bridge Forge and to our new learning brochure

Our aim is to provide teachers with flexible, cross-curricular learning activities that will give pupils an immersive and fun experience that will inspire them to learn.

Our activities take account of pupils' different learning styles and include visual, auditory and kinesthetic experiences. The museum can accommodate up to 30 students at a time and visits are organised so that every young visitor gets a chance to take part in every activity.'

Blacksmithing

Forge Fun - Get on your apron, gloves and goggles and become a real blacksmith.

Local History:

Explore the story of the forge, Spalding's rich merchants and the River Welland.

3D Design and Build

Make the future.

We've been working with local teachers and Museum Development East Midlands to work out what our incredible living museum can offer to schools.

Teachers have told us that museum visits should not be like learning in the classroom – we hope that you find this brochure useful and we look forward to seeing you and your pupils at the **Chain Bridge Forge** in the near future.

Many thanks,

Forge Directors
